LENNAR MARE ISLAND, FINAL INVESTIGATION AREA H2 REMEDIAL INVESTIGATION REPORT, DATED FEBRUARY 2003

Dear Mr. Morris:

The Department of Toxic Substances Control (DTSC) has reviewed the Final Investigation Area (IA) H2 Remedial Investigation (RI) Report dated February 2003 in Eastern Early Transfer Parcel (EETP). The RI evaluates sites of potential environmental concerns within IA H2. DTSC has no further comments at this time and hereby approved the Final IA H2 RI. However, there is an ongoing investigation of petroleum releases from Underground Storage Tanks (USTs) 231 and 243 under the Regional Water Quality Control Board oversight. The final closure certification determination would not be made on areas requiring further investigations and cleanup.

Should you have any questions, please contact me at (510) 540-3759.

Sincerely,

Henry Chui, P.E.
Remedial Project Manager
Office of Military Facilities
